

CSView Meet

View, Markup, Meet and Collaborate From Anywhere in the World

CSVIEW:

- CsView is a multi-format document viewer. It has advanced support for major drawing and image file formats.
- CSView provides maximum flexibility and can be used as a standalone application or be integrated with industry standard document management systems

WHAT DOES IT DO?

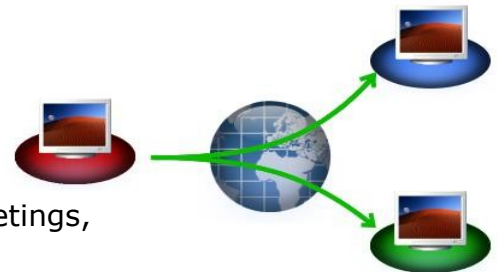

- View all document formats with one software program.
- Print all the documents with a number of options.
- Use the Markup tool to communicate and discuss with partners.

CSVIEW MEET :

- CSVIEW Meet is a collaborative work tool. This service is launched from CSVIEW service that sends the lecturer CSVIEW display to one or several distant hosts. (secured service)
- To use the service, interlocutors can use a Web browser without having to install any software.

WHAT DOES IT DO?

- Remote meetings on drawings.
- Remote technical, sales and marketing meetings,
- Remote maintenance.

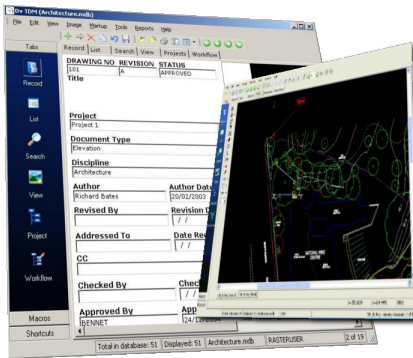

WHAT ARE THE BENEFITS?

- Use just one tool to view and collaborate on all your documents: pdf, dwg, jpeg,tif etc.
- Cut down on your travel expenses by offering remote meetings with the meeting service integrated on CSVIEW.
- Organize remote meetings instantly on any document.
- Use the annotation tool to show your partners and clients a point on a document.
- Have a meeting with your client in Tokyo at 10 a.m. and another with New-York at 11 a.m. It's easy to stay in your office and work around the globe.
- Simplify comprehension of your remote discussions by displaying your screen

WHAT CAN I DO WITH CSVIEW MEET?

- You could host a CSView Meet server on your network; and you can use the conference service internally and with all your clients.
- No more document compatibility problems, as all formats can be read with this system.

Some other using :

- Exchange comment by Markup the documents.
- Technical, sales and marketing meetings
- Remote demonstrations
- Remote expertise
- Remote maintenance
- Collaborative work inside CSVIEW and AutoCAD with the annotation tool.

Security :

CSVIEW Meet is an optimal secured system thanks to a number of features!

- A different access code for every conference.
- Lecturers can crypt their conferences with a 128 Bits SSL coding
- Explicit authorization from the lecturer is necessary for a participant to access the remote control.
- The lecturer can pause or stop the meeting at any point.

Summary :

- You can organize meetings anywhere with your partners, clients and suppliers on joining the picture to the speech.
- Do a complete collaborative work on technical documents and drawings with security and access control, viewing.
- Host your own conference server, and you can handle all accounts.

CSView Meet :

Immediately operational!
